

SOFTWARE ENGINEERING LAB:

Name: Preeti Kalburgi

SRN: PES1UG24AM203

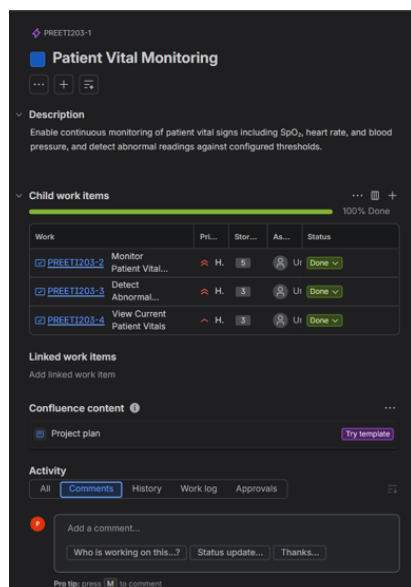

CLASS: AIML-5D

Lab 2: Agile Backlog Creation & Sprint Simulation in Jira

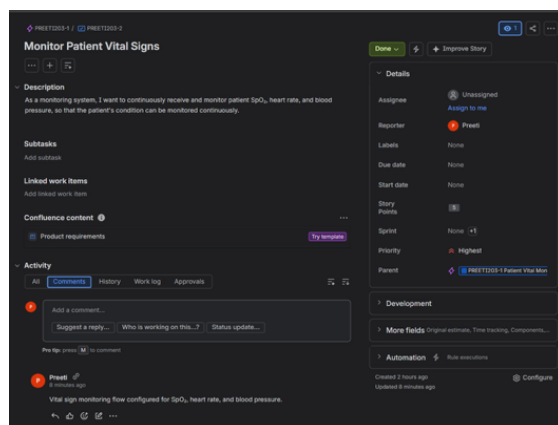

Problem Statement: Remote Patient Vitals Alert and Monitoring App

EPICS AND USER STORIES CREATED:

EPIC 1: Patient Vital Monitoring

Story 1.1: Monitor Patient Vital Signs

Story 1.2: Detect Abnormal Signs

PREETI203-1 / PREETI203-3

Detect Abnormal Vital Signs

...

+

≡

Description

As a monitoring system, I want to compare patient vital signs against configured thresholds, so that abnormal readings can be detected quickly.

+ Create

Group Reflection:

Through this lab, I got a better understanding of how Agile

and Scrum are actually used in a project. I learned how to create epics and user stories in Jira, assign story points and prioritize and arrange the backlog based on the importance of the tasks.

I also created and worked with two one-week sprints. Moving the stories from To Do to In Progress to Done helped us understand how work is tracked during a sprint. Adding comments also helped us keep track of what was being worked on. The burndown chart gave us a simple way to see how much work was completed and how much was still remaining.

Overall, this lab gave us practical experience with Jira and helped us understand how Scrum can make project work more organized, manageable, and easier to track as a team.
